Neapolitan Ice Cream
Assorted Cake
Demi Tasse

Seated at the head of the table were Faithful Navigator Charles O. Murphy and Mrs. Murphy, Judge Edward L. Smith, Revs. J. H. Fitzmaurice, Myles P. Galvin, W. H. Kennedy, W. A. Keefe, of Plainfield, R. R. Morrisey of Voluntown, Corporation Counsel Joseph T. Fanning, Mayor T. C. Murphy, and Miss Isabel Murphy, John M. Lee, master of the fourth degree in this state, and Mrs. Lee.

Toastmaster Murphy. When the last course had been discussed Faithful Navigator Charles O.
Murphy pleasantly opened the post
prandial exercises by introducing
Mayor T. C. Murphy as the first speak-

Mayor Murphy expressed the great pleasure that he felt in being present at this banquet of the Rev. Daniel Mullen assembly. He mentioned some of the facts about the growth of the assembly in the past year, sixty-three having been gained in that time. He referred to the insurance feature of the order and advised all the members new as well as old to pay more attention to this side of the organization.

Corporation Counsel Fanning. Corporation Counsel Fann ed the mayor with an address that held the close attention of the ban-quetters as he sketched some of the conditions and beliefs that preceded by several hundred years the sailing of Christopher Columbus upon the voyage

of discovery. The speaker said thaat recently he had read that a mere man had stated that the greatest delight of his life was to go to church, and upon being asked for his reason said thaat it was because of the wonderful thing that happened there—the man in the pulpit could keep a crowd of women from talking for half an hour. I disclaim any such prejudice, said Mr. Fanning, and indeed I sympathhize with the ladies, who have honored us with their presence, that they are obliged to keep quiet while I compress the common please of my recital into the minutes. because of the wonderful thing that places of my recital into the minutes which are set apart for me on the stop watch which the chairman is holding as about the only comfort he is liable to get as his share of the performance. I trust that they will not feel it necssary as a matter of self protection essary as a matter of self protection to go to sleep, but rather to take an interest in things pertaining to Co-lumbus, if for no other reason, be-cause his glory and the advances of civilization resulting from his achieve-ments were due to the courage, the en-terprise and splendid generosity of one of woman-kind, the iRustrious Isabella, queen of Spain.

queen of Spain. Honor Memory of Columbus. Every gathering of the Knights of Columbus, besides its advertised purpose, is intended to honor the memory of Columbus, to gather now glory for the name of him whom we have adopted for our hero. And as I have been impressed by things which I have read about the great discoverer, I do not think it will be amiss to speak of some of the incidents of history which are incidents to the success of the eventful voyage which brought him through the Sea of Darkness to the blessed landing on San Salvador.

Early Theories of Earth's Roundness There is much that is fantastic about the conditions which have some about the conditions which have some-times been mentioned as inspiring or-recting the great historical venture of Columbus. It has been said that the knowledge of the roundness of the earth was new in his day or that he was the first to appreciate that fact.
That, of course, is not so. Aristotle, teacher of Alexander the Great, proved the sphericity of the earth and stated all the proofs known to us except that of an actual circumnavigation. From 1250 to 1350 merchants and Franciscan monks from Furence had established. can monks from Europe had estab-lished lines of land travel to China-or Cathay—and from such visits it became known that there were sea-ports in China looking out upon the ocean, and Marco Polo, the Venetian, in his book of travel made known that aven beyond the for distant Chithat even beyond the far distant Chi-na was another land which he called Cipango, being Japan, which he claim-ed was still further out a thousand miles in the ocean. after 1250 when it became known

After 1250 when it became known in Europe that there were seaports in China, the wonderful theory was advanced that by sailing westward from Poirtugal these ports might be reached by straight-away sailing, it being considered that there was but one great ocean, the Atlantic, between these countries and this doctrine was most strenuously advanced in 1267 by that wonderful son of the church, the monk Roger Bacon.

experiences of travel, he excited the spirit of inquiring, but his stories were so wonderful that they were not all believed. If istory does not tell that Columbus was acquainted with this work, but he was familiar with the book written by Picvic D' Ailly, the archbishop of Cambrai, called The Image of the World. This book was studied by Columbus and his own copy, with notes in his own handwriting, is now in the Columbian library in Saville.

In Saville.

In 1453 the great city of Constantinople fell into the hands of the Turks, who then more effectually than ever were able to block the land travel from Europe to Carray and stop the expeditions which went forth to gain for the European markets the silks and spices and other precious things.

Advised Sailing Westward. This condition awakened the spirit of investigation to determine whether the far east could not be reached by another route and in 1474 Toscanelli, another route and in 1474 Toscanelli, the great astronomer of Florence, gave both to the king of Portugal and to Columbus the advice that by sailing westward this end could be gained. It was thought, however, that Asia was much nearer than it actually was—that it extended so far that its coast would be about where California actually is, and that Japan would be at the location of what is the Gulf of Mexico. Columbus, in his calculation, had brought Japan even nearer—out into the Atlantic to a distance of about 2510 miles from the Canary Islands, and he salied forth on this theands, and he sailed forth on this the-ory. Thus he had to proceed between truth and error, but at length alone in that eventful night on deck, when he was at the point when he would have to contend with mutiny or des-pair, the light appeared on the shore where the natives worshipped in God's first temples and where would glow eternally the torches of liberty and national righteousness, showing to all the world its way to security and hap-Mr. Fanning was warmly applauded and was followed by Judge Edward L. Smith of Hartford, a former mayor of Hartford.

Judge Smith Speaks. With numerous witty touches that referred to his experiences as a mayor and a judge, Judge Smith caught the attentive interest of his audience, also expressing appreciation of the excellent presentation given by Mr. Fanning of the state of mind in the world leading up to the time of Columbius. leading up to the time of Columbus.

Judge Smith then went on to speak in a more serious vein and said in

part as follows:

In these unhappy days that have come upon the world, it is right and proper for any intelligent man to reflect on the relation he bears to the political entity of which he forms a constituent part. constituent part. That sentence mere-ly means that it is worth while for a man, especially so at this time, to find out whether he is performing his duty as a citizen, and, if he is not, to dis-cover wherein his service is defective, and how the defect may be remedied. I shall not waste a word in telling you what the ideals of your organization

JUDGE EDWARD L. SMITH I do not propose to bring coal to Newcastle. But I do wish to lay before you some thoughts which may lead us to think that the fair accomplishment of your organized effort works eminently toward the develop-ment of a useful and intrinsically valuable citizenship

Individual and State. The brains of political philosopher have been for ages trying to decide whether the state exists for the indi-vidual or the individual for the state. The political doctrines which we have inherited, and in which we still have faith, make the individual the important element, and not the state. cannot read magna charter, the bill of rights, fundamental orders, the Decla-

Adjutant General Gives Notice of the Change in Regulations. Orders issued Thursday from the adfutant general's office give notice of a change in the regulations regard-ing the establishment of the reserve

of the establishment of the reserve C. N. G. The changed regulations read as follows:

"Officers on the active list of the C. N. G. may, upon their own application forward through military channels, and with the approval of the adjustant, seneral by transferred channels, and with the approval of the adjutant general, be transferred to a reservelist. Ex-officers of the C. N. G. may apply through the commanding officer of the organization in which they served; such applications will not be approved by commanding officers whose aplicants have been separated from the service for any length of time, nor will they be forwarded, approved, unless the applicants are quite fit, mentally, morally and physically for mentally, morally and physically for active service. Officers on the re-serve list will be subject to active duty only in event of war and other emergency, and in such event may be called into active service by the

Speaker for Y. M. C. A. Service. General Secretary Edwin Hill has secured Dr. H. F. Adams of New Lon-don as the speaker at the Y. M. C. A. don as the speaker at the Y. M. C. A. service in the Thayer building on Sunday afternoon at 3.30 o'clock. Dr. Adams will speak on The Greatest Sale in the World. There will be singing by the quartette of the Church of the Good Shepherd (Universalist) and Swahn's orchestra will provide music.

most strenuously advanced in 1267
by that wonderful son of the church,
the monk Roger Bacen.

Studied Archbishop's Book.

When Marco Pele, after twenty years of service with the ruler of the Celebrated at the association building Chinese country, in 1292, wrote his on Chapel street Thursday afternoon.

Strength for run-down, nervous, overworked women.

We have seen such wonderful results right here in Norwich from the use of Vinol, that we will return the use of service with the ruler of the Celebrated at the association building falls to give satisfaction. G. G. Engler, Broadway Pharmacy, Norwich.

AMATEUR WIRELESS MEN WILL STAND BY

Norwich Operatore Can Listen to Washington's Birthday Message.

Amateur wireless operators here may be called upon to aid when a twentieth century Paul Revere's ride will be at-tempted by the United States governtempted by the United States government on Feb. 22, and the first move in radio preparedness will be taken. In his day Paul Revers used the quickest means available to spread the order for mobilisation—a horse. On Washington's birthday the quickest known means of transmitting messages, the wireless, will be tested, and the war message that will be flashed out from Rock Island arsensi, Ill., will travel around the United States. There are 25,000 licensed amateurs in the whole country, and it is safe to say that nine-tenths of them will be at their receivers when the message comes.

their receivers when the message comes.

At 11 o'clock on the night of Feb. 21, central time (10 o'clock, eastern time), a "stand by" message will be sent out, and all amateurs are expected to get this message. Then there will be delivered by the federal government, through a messenger, a military despatch to the Rock Island arsenal. This will be opened by the wireless operator at the arsenal, who will then see it for the first time.

The operator will flash forth the message, and it will be picked up by other government stations and amateurs within the hearing distance. One of 65 designated stations will listen for a clear atmosphere, and in turn will send out the message to the next relay of operators, who also will repeat the message. The message will be delivered in each city or state to the mayor or governor. or governor.

It is admitted in government circles that the whole plan is to learn how quickly an army of \$,000,000 soldiers can be mobilised.

BOY SCOUTS GAIN NEARLY FIFTY PER CENT. Connecticut Has One Boy Scout to Every 268 of Population.

An increase of 45 per cent, in membership during the last year was announced Thursday at the annual meeting of the National council of the Boy Scouts of America. The in-crease to 182,622 boys and scout mayers made the year the most pros-perous in the six years' history of the movement.

the movement. The chief scout executive's report said that scout troops had been or-ganized in almost every church denomination in the country; that 3,489 troops met in churches; that 3,000 troops met in school buildings, armand community institutions, and the 7,067 scout masters includ-

that the 7,067 scout masters includer clergymen, physicians, lawyers,
teachers and other professional men,
all of high character.

The membership shows that there
is one Boy Scout in every 453 of population in New York; one in every
269 in New Jersey; one in 448 in
Maryland; one in 282 in Delaware;
one in 268 in Connecticut; one in
470 in Pennsylvania; one in 392 in
Massachusetts; one in 172 in Utah,
and one in 297 in the District of Columbia.

Among the features reported were: A department of education provided by two special gifts: training courses in several universities and colleges; budgets provided in forty cities, and a library department concentrated with the influence of books on boys.

CIVIL ENGINEERS WILL INSPECT WINCHESTER PLANT When They Have Their Annual Con-

ference at Hartford. The thirty-second annual confer ence of the Connecticut Society of Civil Engineers will be held in the Mason laboratory, Hillhouse av-enue, New Haven, February 15 and ente. New Haven, February 15 and 16. The convention will open at 10 a. m. on the first day and the regular business session and election of officers will take place. In the afternoon there will be addresses by Kenneth Allen, engineer on sewage disposal, New York city; Professor C. E. A. Winslow, of Yale university, and another speaker, who has not been selected. On the second day of the convention opportunity will be afforded the members to inspect the new dock of the Winchester Repeating Arms company on the east side of the harbor and there will be a

Arms company on the east side of the harbor and there will be a series of addresses by H. L. Ripley, valuation engineer of the New Haven road: Edgard H. Everit, engineer of the Southern New England Telephone company; George E. Verrill, engineer; Charles Nord, formerly assistant engineer Waterbury; Roy C. Cram, of the Brooklyn Rapid Transit engineering forces; W. Watters Pagon and Paul Spencer.

THREE PRISONERS FROM JAIL TO WETHERSFIELD. Sheriff Brown Took Trlo to Serve Their Terms.

Sheriff Sidney A. Brown took three prisoners to the state prison at Wethersfield Thursday morning, who have been in the county jall in New London. They were sentenced at the September term of the criminal superior court to state prison terms.

The prisoners were Exra Mather, who was sentenced to from one to three years on the charge of burgiary in entering the house of Percy Daniels in East Lyme last September; Thomas Logis, who pleaded guilty to the charge of assault with intent to kill William Detchy of Norwich with a pistol last November and who was sentenced to from one to three years and Harry B. Simpson, who was given a sentence of not less than three nor more than six years for indecent assault on his six-year old daughter.

Harwinton.—Effic May Phelps, aged 4, daughter of Mr. and Mrs. Edward S. Phelps, died at midnight Wednesday at the Litchfield county hospital in Winsted as the result of burns re-ceived during the forenoon. The child and a young brother secured some Christmas candles, lighted them, and the girl's dress ignited.

NERVOUS-NO APPETITE

Hartford Woman Tells how She Regained Strength.

Hartford, Conn. "I was run-down, Hartford, Conn. "I was run-down, nervous, no appetite, could not sleep, and had no strength, an old lady told me how much Vinoi had helped her when in a like condition. I tried it and noticed an improvement within a week. It soon built up my strength, my nervousness disappeared and I can sleep well. I have never found any remedy equal to Vinoi to create strength." Mrs. Clara Burr.

It's the tonic iron, the medicinal extractives of fresh code' liver without oil, and beef peptone contained in Vinoi, that makes it so successful in enriching the blood and creating strength for run-down, nervous, overworked women.

## **KEEP LOOKING YOUNG**

Easy - If You Know Edwards' Olive Tablet.

The secret of keeping young is to feel young—to do this you must, watch your liver and bowels—there's no need of having a sallow complexion—dark rings under your eyes—pimples—a billious look in your face—duil eyes with no sparkle.

Your doctor will tell you ninety per cent of all sickness comes from inactive bowels and liver.

Dr. Edwards, a well-known physician in Ohio, perfected a vegetable compound mixed with olive oil to act on the liver and bowels, which he gave to his patients for years.

Dr. Edwards' Olive Tablets, the substitute for calomel, are gentle in their action, yet always effective.

They bring about that exuberance of spirit, that natural buoyancy which should be enjoyed by everyone, by toning up the liver and clearing the system of impurities.

You will know Dr. Edwards' Olive Tablets by their olive color. 10c and 25c per box. All druggists.

The Olive Tablet Company, Columbus, O.
